
Software Project Proposal Format

Cover Page

- **Content:**
 - Project Title
 - School/Institution name
 - Course/Instructor name
 - Date of submission
 - **Design tip:** Use clean design with relevant icons or visual elements that reflect the software's theme.
-

Page 1: Table of Contents

- List of all major sections with corresponding page numbers.
 - Helps the reader easily navigate the document.
 - Insert design per page (Mandatory)
-

Page 2: Project Overview

- **Content:**
 - A brief summary of the project (2–3 paragraphs)
 - What the software does and the problem it solves
 - Type of users (e.g., students, businesses, teachers)
 - **Purpose:** Gives readers a quick understanding of the software's function and value.
-

Page 3: Background / Introduction (or Get to know about us)

- **Content:**
 - **Problem Statement:** What is the current issue or gap?
 - **Need for the Software:** Why is this project important?
 - **Target Users:** Who will use the software? (demographics, needs)
 - **Purpose:** Sets the context and explains why this project is necessary.
-

Page 4: Goals and Objectives (Defining the Project)

- **Content:**
 - Clear, measurable goals the project will achieve
 - **Example:** “To develop a mobile app that helps users manage their daily expenses effectively.”
 - **Purpose:** Shows the intended impact and purpose of the software.
-

Page 5: Our Service

- **Content:**
 - What service or functionality your software provides
 - Short description of how it will benefit users
 - **Optional:** Include mockup images or screenshots if available.
-

Page 6: Project Scope

- **Content:**
 - **Inclusions:** Main features/modules (e.g., login system, dashboard, reporting)
 - **Exclusions:** What is NOT part of the project (e.g., hardware integration)
 - **Purpose:** Clarifies boundaries to manage expectations.
-

Page 7: Software Requirements

- **a. Functional Requirements:**
 - Features and actions the software must perform (e.g., user registration, search function)
 - **b. Non-Functional Requirements:**
 - Quality aspects like performance, security, usability, responsiveness, and scalability
 - **Purpose:** Defines how the software should behave and perform.
-

Page 8: Technology Stack

- **Content:**
 - Programming Languages (e.g., JavaScript, Python)
 - Frameworks (e.g., Django, React)
 - Database (e.g., MySQL, Firebase)

- Platforms (e.g., Web, Android, iOS)
 - **Purpose:** Shows the technical foundation of the project.
-

Page 9: System Architecture / Design

- **Content:**
 - System architecture diagram (e.g., client-server model, data flow diagram)
 - ER Diagram for database (if needed)
 - Explanation of how parts interact (modules, APIs)
 - **Purpose:** Visual and structural understanding of the system.
-

Page 10: Features & Screenshots (Optional)

- **Content:**
 - Visual mockups, wireframes, or early screenshots
 - Feature descriptions
 - **Purpose:** Gives a preview of the final look and feel of the software.
-

Page 11: Work Plan / Timeline (Work Implementation Plan)

- **Content:**
 - Gantt Chart or milestone table
 - Phases: Planning → Design → Development → Testing → Deployment
 - Estimated time for each phase
 - **Purpose:** Shows planning and time management.
-

Page 12: Budget and Resources

- **Content:**
 - Estimated budget (hardware, software, licenses, cloud services)
 - Manpower or external support costs
 - **Purpose:** Provides financial planning and resource awareness.
-

Page 13: Risk Management

- **Content:**

- List of possible risks (technical issues, deadline delays)
 - Mitigation strategies (backup plans, alternative tools)
 - **Purpose:** Demonstrates foresight and preparation for challenges.
-

Page 14: Expected Output / Deliverables

- **Content:**
 - List of final outputs (e.g., software, user manual, source code, presentations)
 - Version or scope of delivery
 - **Purpose:** Clarifies what the client or teacher should expect.
-

Page 15: Conclusion

- **Content:**
 - Summary of the project's potential impact and success
 - Final thoughts or future development ideas
 - **Purpose:** Ends the proposal on a positive and visionary note.
-

Final Page: Meet Our Team (Page 4 or Page 5 is acceptable)

- **Content:**
 - Professional photo of each member
 - Name, role (e.g., Project Manager, Developer), and contact info (email, LinkedIn)
- **Purpose:** Personalizes the proposal and gives credit to the contributors.
- **Quotes:** Personalizes the proposal and gives credit to the contributors.

Page 16: Attachments / Annexes (*Optional but recommended*)

- Blueprints (optional)
- Photos of similar projects
- Product/material samples (Optional)
- Certifications or licenses/Permit & legal requirements (Optional: If you can make a sample)
